

Nuance[®] Dragon[®] Legal Individual

Let your voice empower you for your legal work.

If you are a busy legal professional who spends a lot of time on a computer, you would want to be the most productive with all your computing tasks to fit more in your hectic day. Using a keyboard and mouse as your primary computer interface can be slow, require a lot of correction and cause stress and strain on your arms, neck or back, even if you are a fast typist. What if you had another way to interface with your computer that is natural, accurate and fast to boost your productivity potential?

Designed specifically for the legal industry, Nuance[®] Dragon[®] Legal Individual speech recognition software drives documentation productivity for individual attorneys and other legal professionals. It delivers optimal recognition accuracy when dictating legal terms, along with fast transcription, automatic formatting of legal citations and easy customization, to boost efficiency and speed document turnaround, allowing you to spend more time with clients and increase billable hours. For professional-grade dictation on the go, automatically sync customizations with your Nuance Dragon Anywhere-enabled mobile device to be productive by voice anytime, anywhere.

Legal-specific solution

Dragon Legal Individual is trained using more than 400 million words from legal documents to deliver optimal recognition accuracy for dictation of legal terms right from the start. To further increase accuracy, you can create, import and share custom word lists that are relevant to your legal clients. Dragon also enables you to format legal citations automatically and leverage third-party correction features to speed document turnaround and free support staff to focus on higher-value tasks.

The fastest and most accurate way to interact with your computer

- Delivers up to 99% speech recognition accuracy right out of the box
 - Get highly accurate speech recognition results with no training required
 - Eliminate spelling concerns and minimize corrections
 - Enjoy superior reliability and performance with Dragon's strong technology foundation
- Provides a personalized voice-driven experience
 - Achieve increasingly accurate results the more you use it
 - Enjoy personalized accuracy;

Key features and benefits

- Legal-specific solution with special language model
- Format legal citations automatically
- A fast, accurate, and personalized speech recognition experience
- Think out loud to create, format and edit by voice quickly and efficiently
- Import/export custom word lists to share unique legal terminology among peers
- Create custom voice commands to insert frequently-used text and graphics
- Sync dictation and customizations with the Dragon Anywhere app for productivity while visiting clients
- Dictate text within popular desktop and Web applications
- Capture thoughts on the go for later automatic transcription
- Command and control your computer by voice in ergonomic, hands-free comfort
- Reduce physical stress from typing or meet accessibility needs
- Master the software easily with in-context "hint on the spot" and other helpful tools

- Dragon learns the words and phrases you use the most and spells even difficult words and proper names correctly
- Further enhance accuracy with optional advanced training or analysis of existing documents and emails
 - Work your way using Smart Format Rules; dictate naturally and the text appears as you intended it to
 - Work effortlessly with a solution that just “gets” you and how you speak
- Speed through work with fast response times and minimal latency
- Talk at normal speeds and see words appear on the screen almost instantly
 - Receive immediate feedback on what you say so you can check it right away
 - Never lose a beat in your train of thought; Dragon captures your ideas as fast as you can speak them

Use your voice to dictate documents or enter text anywhere you normally type

Dragon eliminates barriers to productivity and creativity by letting you interact with your computer by voice. It turns your spoken thoughts into text and your voice commands into action so you don't have to worry about the mechanics of typing and spelling.

- Think out loud
- Avoid spelling errors
- Capture ideas up to three times faster than typing
- Multitask thanks to hands-free interaction
- Enter text quickly in forms, Web applications, emails and more

Edit and format documents—all by voice

Dragon not only lets you dictate up to three times faster than typing, but it also allows you to make edits

and apply formatting using your voice. You can select text and apply formatting such as bold, underline, capitals and more, or just speak to make needed changes. Smart Format Rules automatically adapt to how you want abbreviations, numbers and more to appear, so you don't have to correct them every time.

- Make edits and format text quickly—faster than using a keyboard and mouse
- Automatically format text to appear the way you want it to—every time
- Easily switch between keyboard, mouse and voice so you can use the mode of input you prefer for any given task

Import/export custom word lists and vocabulary

Dragon Legal Individual easily learns acronyms, proper names and legal-specific terminology and phrases you frequently use to capture vocabulary the way you want. The ability to customize your vocabulary increases recognition accuracy and minimizes the need for corrections. In addition, you can import and export your custom word lists.

Create custom voice commands for inserting frequently used text and graphics

With Dragon Legal Individual, it's easy to create custom voice commands for quickly inserting frequently-used text and graphics. This feature saves time and effort by letting you insert a standard reply, a signature block, a logo or other boilerplates by speaking a simple command.

Automate business processes with time-saving macros

Create macros to automate simple workflows or multi-step business processes via simple voice commands. For example, send an email to your clients, copy your colleagues, and print a hard copy for

your files by saying something like, “Send standard notification email.”

Sync with separate Nuance Dragon Anywhere mobile app

Dragon Anywhere is a separate, cloud-based app that provides continuous dictation capabilities, letting you create and edit documents of any length by voice—using your own customized vocabularies, shortcuts and commands—directly on your iOS® or Android™ mobile device. It adapts to your voice and terminology so you can dictate, edit, navigate and format quickly and accurately within your document from anywhere. Share documents and sync custom words and texts with Dragon Legal Individual for seamless productivity wherever your job takes you. Gain immediate access to your dictation without having to wait or rely on a costly transcription service so you can spend more time contributing to your bottom line and less time behind a desk completing administrative tasks.

Enjoy superior voice command and control in many popular applications

Dragon gives you robust voice command and control as well as Full Text Control (full voice-driven editing and command capabilities) within many popular applications you use every day, enabling you to create documents and zip through computer tasks in record time.

Transcribe your recordings from audio files

Dragon Legal Individual supports Nuance-approved digital voice recorders for advanced recording functionality and can automatically transcribe the audio files to text back at your computer. You may prefer to take notes by recording your voice into an audio device for later transcription, or you can use the Dragon Anywhere mobile app for immediate, professional-grade dictation. Dragon Legal Individual

lets you work the way you want to optimize your productivity on the road.

For added flexibility you can accurately transcribe another single speaker's voice from pre-recorded audio files or from podcasts. To transcribe an audio file, Dragon checks whether your profile needs a transcription source created and leads you through a training process. If your audio recording is of a different speaker, you must create a new profile. All that's needed for training is a 90-second audio clip of that speaker; he or she doesn't need to be present to read a passage.

Command and control your computer by voice

If you wish, you can launch applications, select menu items, press keys, switch between windows, search the Web, create and send emails and more all by voice. Dragon Legal Individual gives you the flexibility to:

- Work hands-free, if desired
- Experience more ergonomic comfort when working on your computer
- Feel less stress and strain on your body
- Multitask by using your voice to dictate and execute commands

Simplify proofreading with natural-sounding text-to-speech or audio playback

Dragon's text-to-speech capability is a natural-sounding synthesized voice that reads designated text to

you, thereby simplifying proofreading and supporting new levels of multi-tasking. With Dragon Legal Individual, you can also listen to audio playback of your own dictation with the associated text highlighted on the screen.

Choose your microphone option for freedom and flexibility

With automatic microphone detection, Dragon will conveniently show you which microphones are available for you to use. Dragon Legal Individual allows you to use multiple audio device types within the same profile so you can easily switch to another microphone while keeping all your personalized preferences for accuracy and formatting. This is useful if, for example, you use a USB mic at home, a wireless mic at work and your laptop's built-in mic when you're on the go. You have the option to use:

- Microphones built into many of the latest laptops: You're free to dictate documents and speak commands directly into your laptop without using a headset for optimal flexibility and convenience
- Wireless Bluetooth mic: Use a Nuance-certified Bluetooth headset microphone for outstanding wireless performance and the freedom to move while working on your computer
- Any other Nuance-approved microphone: See support.nuance.com/compatibility for more information

Extend accessibility and prevent repetitive stress injuries

Dragon Legal Individual supports Section 508 standards to eliminate barriers for individual workers with disabilities that limit their ability to use a keyboard and mouse. In addition, it helps prevent fatigue and repetitive stress injuries by offering a comfortable, ergonomic alternative to the keyboard and mouse.

Easy to get started, easy to master

Dragon Legal Individual makes it easy to get started with speech recognition and to become proficient quickly with regular use. It's also simple to explore more advanced features that can boost your productivity even further.

- Fast, simple set-up gets you going with speech recognition in no time
- Tutorials help you become productive right away
- An intuitive design provides easy access to a rich and powerful feature set for ever-increasing productivity gains
- Additional help with in-context guidance provides a "hint on the spot" and allows you to learn essential commands over time
